

Manor Spa

For ladies (and gents) who enjoy a non-invasive nip tuck, then Manor Spa has just opened over in Sale. It also houses Manor Dental, an ultra high-tech dental clinic, but the spa side of the clinic offers a range of treatments suitable for those who want a little tweak. The spa is uber-slick with lush interiors and top-of-the-range equipment.

The peels they have on offer are administered by doctors and start with treating the skin from the inside out which, when you think about it, makes sense. The peels treat acne, stretch marks, aging skin, sun damage and wrinkles.

Enhancements including Botox start from £195.

Manor Spa is currently the only Spa in Manchester to have the Soprano XL – which loosely translates as pain-free (!!) hair removal. All lasers and IPL treatments hurt - it's a similar feel to an elastic band being flicked against your skin and whilst the Soprano is still very powerful, it works by removing the hair without pain and feels just like a massage!
